 ***The Figures marked in **Green** are above the QoS requirement

June 2017 Mobile Operators' 3G Quality of Service (QoS) Performance Reprot

Performance Indicators Definition

- ❖ Call Setup Success Rate (CSSR)– is used to measure the percentage of calls successfully established without facing blockage in the network . **(To check network accessibility)**
- ❖ Call Drop Rate (CDR) – is used to measure the percentage of calls dropped due to technical problems or coverage gaps in the service provider's network . **(To check network retain-ability)**
- ❖ Call Success Rate (CSR) -is used to measure the percentage of the total number of call attempts made to access and establish a voice call and then successfully terminated from the user-end without being dropped or disconnected from the network side due to a technical irregularity. **(To check service integrity)**
- ❖ Hand over Success Rate - is used to measure call moving between cells to continue conversation and prevent drop call on the Network. **(To Check Mobility)**

***The Figures Marked in **Red** are below the QoS requirement

***The Figures marked in **Green** are above the QoS requirement
